

# Nos partenaires

**Wonderware** is a leading supplier of industrial automation and information software, which is legendary for its ease of use and for providing exceptional integration benefits. Because Wonderware® software transforms data into vital plant information, Wonderware powers intelligent plant decisions in real time.

**Intellution Dynamics** is a best-in-class family of integrated automation software components that enables users to optimize plant floor performance, to link plant information with enterprise business systems, and ultimately to achieve the benefits of the integrated eManufacturing enterprise.

**Cognex Corporation** is the world's leading supplier of machine vision systems - or computers that can "see" - which are used to automate a wide range of manufacturing processes where vision is required. Cognex's vision systems automatically identify products, inspect for defects, gauge part dimensions, and guide robotic equipment.

**OSI Software** is a leading global supplier of software products for managing information in the process manufacturing industries. Its Plant Information System (PI) is a major component of enterprise systems for leading manufacturers of oil and gas, chemicals, electric power, pulp and paper, telecommunications, metal, minerals, discrete manufacturing, food and pharmaceuticals.

No matter what your Industry you can rest assured that you will enjoy innovative features from **GE Fanuc** worldwide. From PLCs to CNCs, Embedded Systems to Automation Software, our innovative products and Services help companies around the world better manage their systems and processes.

**FANUC Robotics America, Inc.** is the leading supplier of robotic automation in North and South America. They offer over 175 robot model variations to meet the needs of a wide range of applications. Our solutions and support services help manufacturers realize significant improvements in throughput, quality, productivity, and provide a quick return on investment.

**Schneider Electric** is the only company exclusively focused on its two particular businesses: Electrical Distribution and Automation & Control. At a time when electrical, automation and communication technologies are converging, this strong specialisation enables the Group to occupy a leading international position.

**Automation Training** is a group of experienced Instructors that have been working in the factory automation business for over 20 years. Our business is providing hands-on PLC training programs in factory automation control systems. We also offer customized job aids that can be used as a refresher course. "If you don't use it you will lose it!" Since the mid 1980's our Instructors have been teaching PLC courses, HMI products, Drives, Motion control and communication products to many Fortune 500 companies.

**MDT Software** is the world leader in change management solutions for automated manufacturing assets. Founded in 1983, MDT addresses security and change control concerns for a wide and comprehensive range of devices and editors for Allen-Bradley, Intellution, Microsoft, Modicon, Rockwell Automation, Schneider, Siemens, Telemecanique, and Wonderware.

**Rockwell Automation /Allen-Bradley** is a leading industrial automation company focused to be the most valued global provider of power, control and information solutions. With a focus on automation solutions that help customers meet productivity objectives, the company brings together leading brands in industrial automation, motors and drives, controls and engineered services and factory management software.
